(54) RESIN COMPOSITION

(57) Abstract:

PURPOSE: To obtain a resin composition, a blend of highly compatible polyolefin resin, polycarbonate resin and/or polyester resin, and a specific block copolymer.

CONSTITUTION: This resin composition is obtained by kneading, in a molten state, a total of 100 pts. wt. of (a) 10-90wt.% of a polyolefin resin and (b) 90-10wt.% of a polycarbonate resin and/or polyester resin with (c) 0.5-30 pts. wt. of a hydrogenated diene-lactone block copolymer made up of (A) 0-80wt.% of block segment predominant in an aromatic vinyl compound, (B) 10-90wt.% of block segment predominant in a hydrogenated conjugated diene compound and (C) 10-90wt.% of block segment predominant in a lactone compound.
